

AUTOMATING THE IRB RESEARCH COMPLIANCE REVIEW PROCESS TO SUPPORT NMSU STUDENTS AND FACULTY

INTRODUCTION: WHO & WHAT

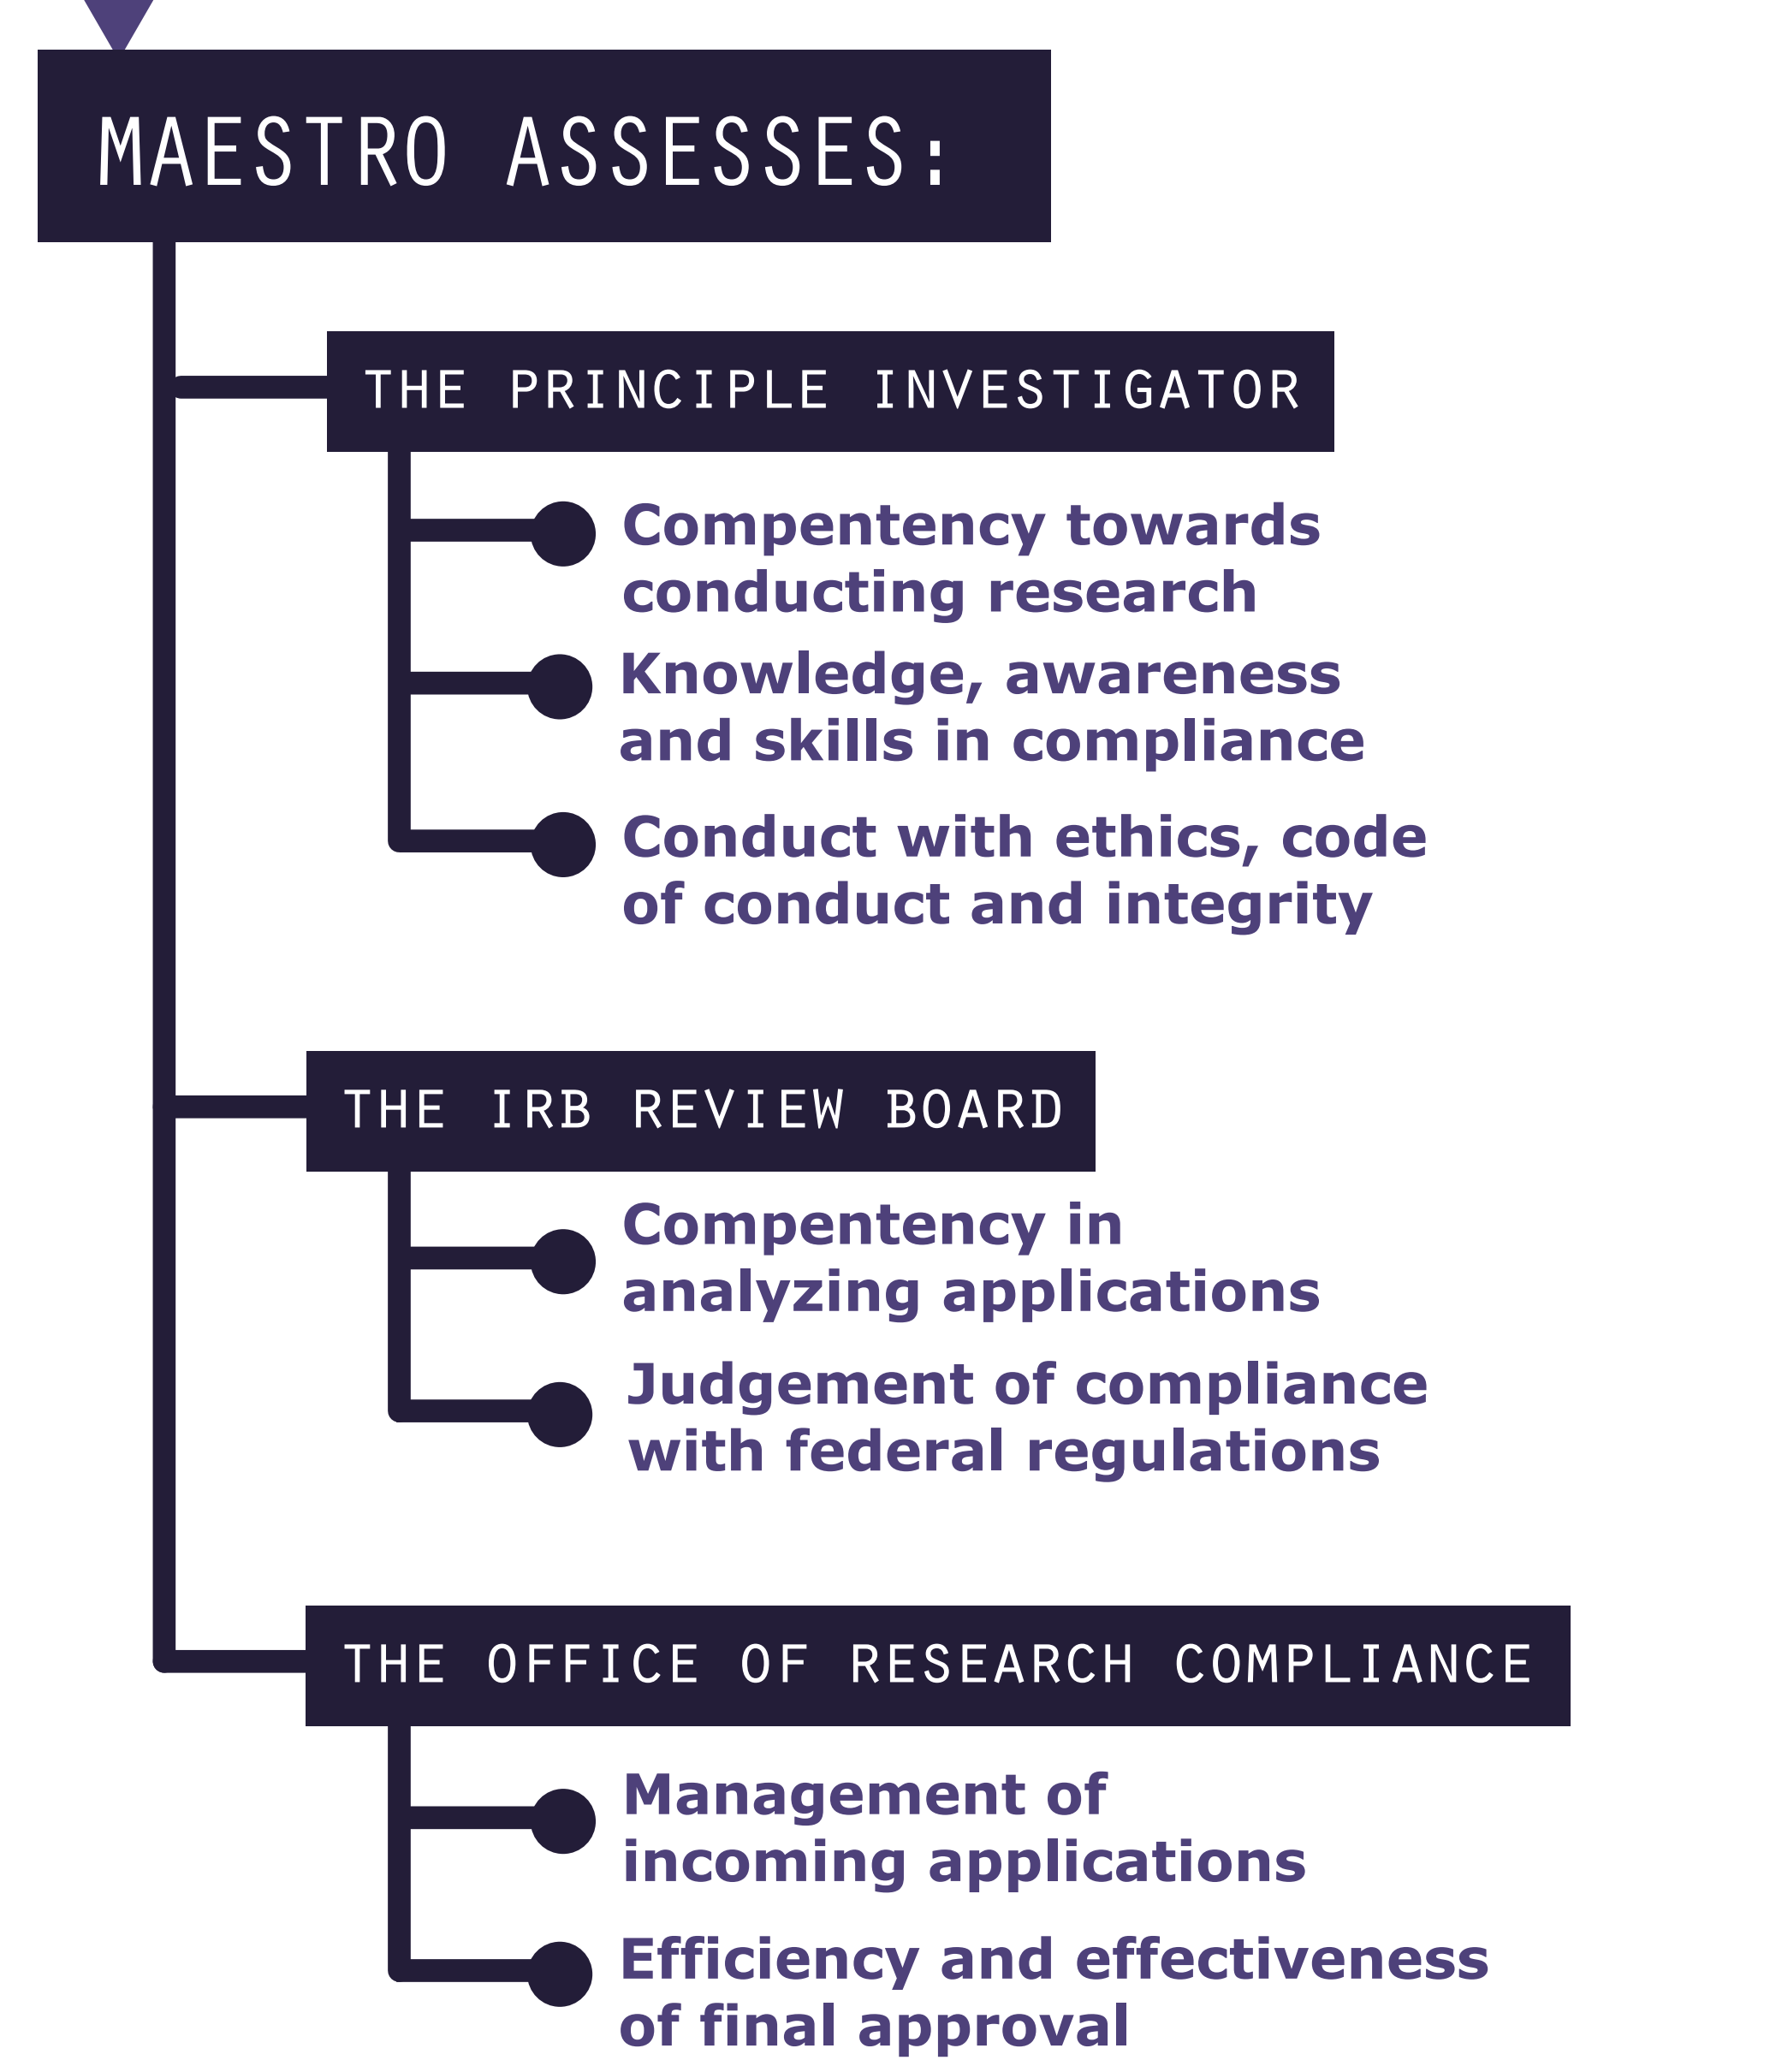

The MAESTRO team was established through a collaboration with the Associate Vice President for Research Integrity, Office of Research Compliance, and Research IT to automate the compliance review process and make it accessible online.

GOALS	IMPLEMENTATION	ASSESSMENT
DEVELOPMENT Update current process, automate and access online	Save steps, resources, streamline and update processes	Effective and efficient Facilitates collaboration

- ### TASKS
- Define the requirements
 - Document the current manual process
 - Review and analyze current products and development options
 - Develop project plan and schedule
 - Design, implement, and test the new electronic system
 - Document and provide training, documentation, website, customer support, branding, etc

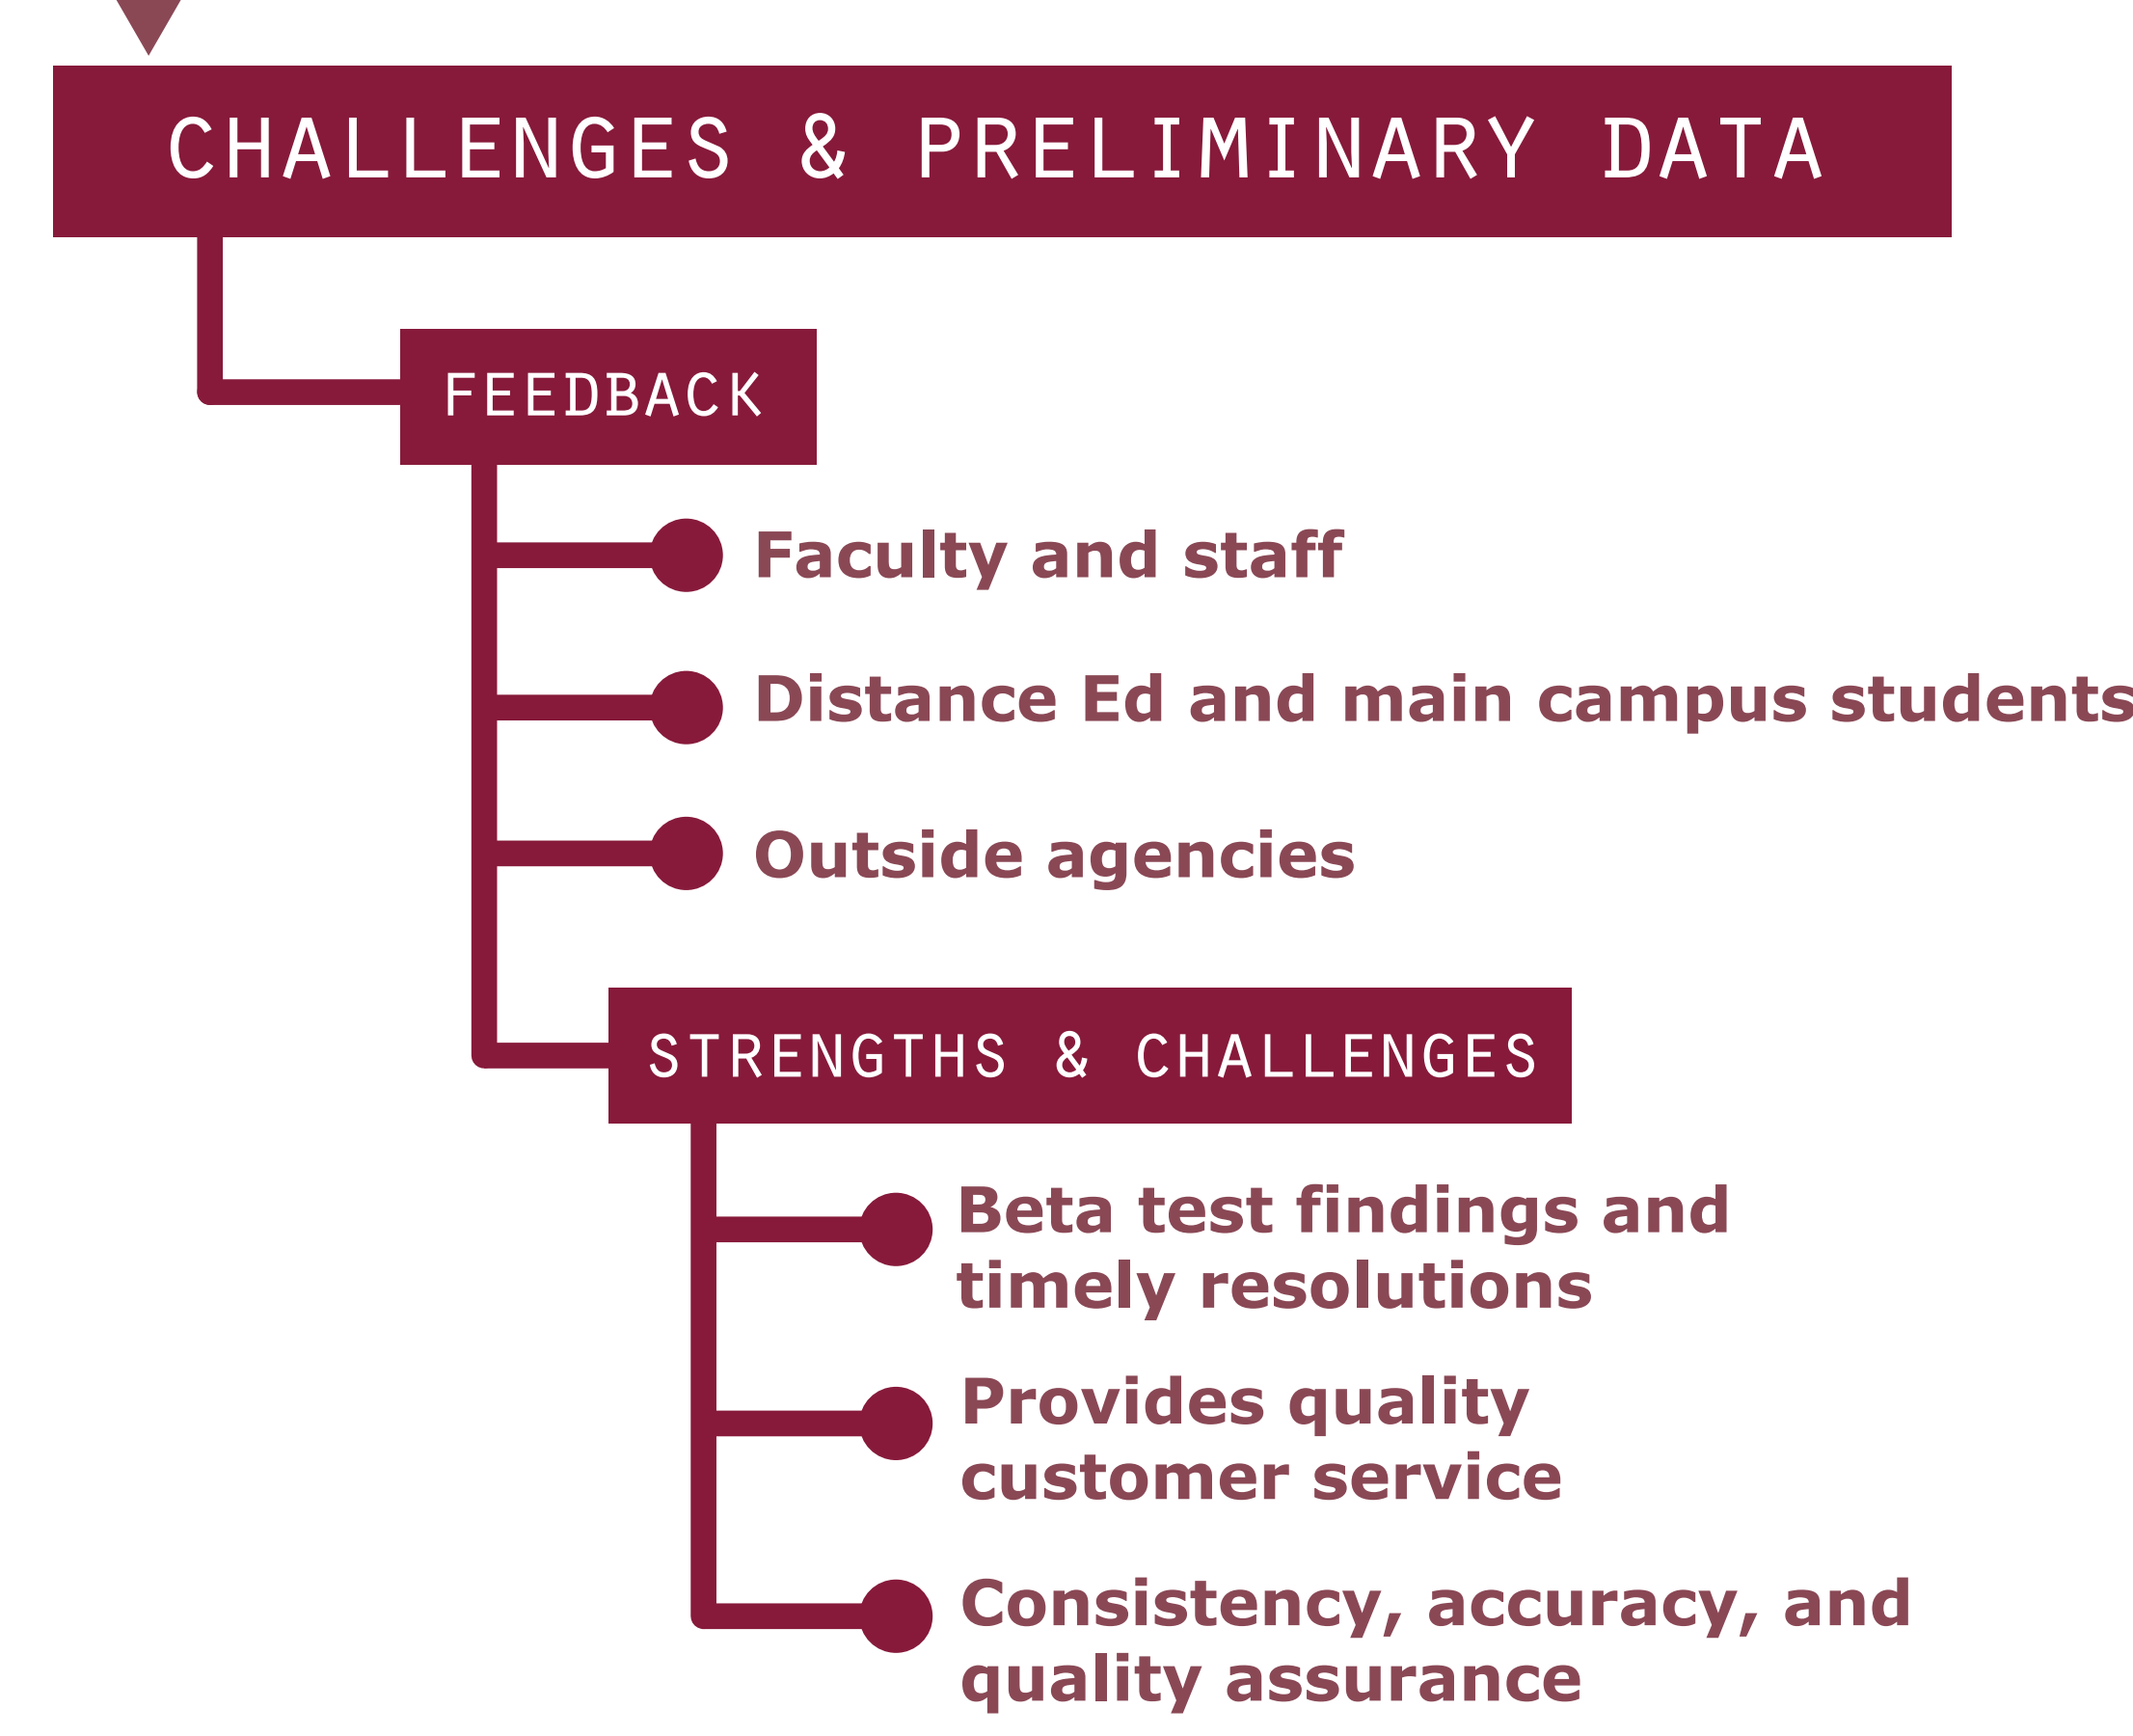

ONLINE APPLICATION PROCESS

Accessing the Compliance of Federal Regulations in university research involving Human Subjects.

CONCLUSION: NEXT STEPS

Continue customer support, development, enhancements, analysis, and improvement measures for the process and data collection of research projects and IRB review process.
